

THE AMERICAN FISHERIES SOCIETY...

- Comprises 8,000+ members from around the world, including fisheries managers, biologists, professors, ecologists, aquaculturists, economists, engineers, geneticists, and social scientists
- Includes 4 regional Divisions, 48 Chapters, 50 Student Subunits, and 24 Sections for specific fields
- Promotes scientific research and sustainable management of fisheries resources
- Publishes six respected and crucial fisheries journals, a monthly magazine, and many renowned books
- Organizes scientific meetings where thousands of professionals report and discuss new results
- Offers comprehensive education and professional development for fisheries professionals

Included with your membership: **Fisheries** monthly magazine, featuring peer-reviewed science, interviews, news, events, and much more.

I encourage my students to join AFS because it reveals how fisheries professionals are applying science to conserve fisheries and aquatic resources in real time.
—Jason Vokoun, University of Connecticut

TYPES OF MEMBERSHIP

Category	Dues (US\$)
Regular Working professionals	\$95
Student Includes journals online	\$25

Take Your Career Further

CAREER ADVANCEMENT

Go further with your education and your career. Take our continuing education (CE) courses, share your best practices, and participate in an online webinar.

Get certified as an AFS-sanctioned fisheries professional and expand your job opportunities. **Keep up** with the latest science in *Fisheries* magazine, six AFS journals, and books.

Enhance your network with leaders in the fisheries science field and **develop leadership skills**. Contribute to the **development of industry standards** in areas such as sampling or aquaculture.

Being a part of the AFS community means having access to the professional network, tools, and knowledge needed to address the complexities of fisheries conservation.
—Jesse Trushenski, Idaho Dept. of Fish & Game

NETWORKING

Experience local, regional, and international meetings—sharing information, presentations, current studies, etc., while **making new connections** at networking events and through volunteer service opportunities.

Learn from other states, regions, and countries about the latest fisheries science that impacts you and **share** best practices. **Collaborate** with your peers and take pride in your profession. Become a part of a supportive community in your specialty by joining any of our 23 Sections.

Have more influence over the direction and application of fisheries science. Become an advocate, by actively supporting AFS fisheries policy initiatives on Capitol Hill and beyond. Your voice is important.

AFS is poised to share its nearly 150 years of expertise in fish and fisheries, working with others to use that knowledge to advance fisheries policy and management.
—Tom Bigford, Policy Director

FINANCIAL BENEFITS

Membership levels are **tied to career level**: students and young professionals receive special discounts. Students also enjoy free online journals, lower membership dues and reduced meeting and CE registration fees.

Students can also **get funded** to travel to the Annual Meeting and other conferences with AFS travel grants.

Members **save money** on AFS books, meeting registration, publication fees and receive **six complimentary journals**. AFS membership shows your commitment to the profession and may help you **get hired** by employers. Access our job listings, plus learn from AFS mentors.

My Chapter requires full AFS membership because we saw the clear benefits. We can simply do more, as a group and as individuals, with more resources.
—Aaron Martin, Alaska Chapter
